

EXPLANATION

The Academic Year

Each academic year of Fudan University has a fall semester, a spring semester and intensive summer sessions. Each semester includes 18 teaching weeks. For principal courses, i.e., courses focusing on principles, concepts and ideas, students earn one credit for one hour of instruction in class per week throughout the semester. The ratio of weekly contact hours to credit hours varies for practice, laboratory, listening comprehension and physical education courses, which is usually set by the respective teaching division for these courses.

Method of Assessment and Calculation of Scores

1. Examination results are recorded according to the floating-point system. Below is the Conversion table for the letter grades and their numerical equivalents.

Grade	A	A-	B+	B	B-	C+	C	C-	D	D-	F	P	NP
Grade Point Conversion	4.0	3.7	3.3	3.0	2.7	2.3	2.0	1.7	1.3	1.0	0	/	/
Corresponding percentage	90- 100	85- 89	82- 84	78- 81	75- 77	71- 74	66- 70	62- 65	60- 61	pass after re-sit	59 and below	60- 100	59 and below

The method for calculating the grade point of credits is:

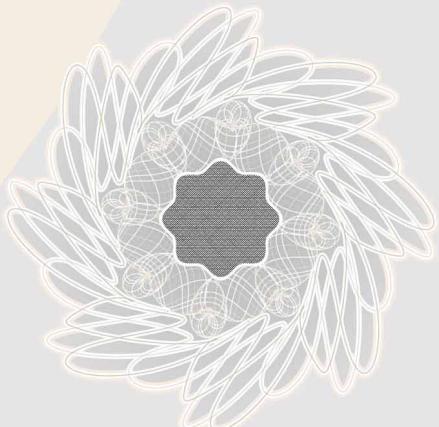

The credit score for a course = the score × the credit coefficient;

The GPA for a semester/academic year = \sum scores obtained on all courses taken ÷ \sum the credit coefficients of these courses.

2. The symbol “*” refers to results obtained outside the University that count towards credits but do not count towards the GPA.
3. For courses whose final assessment is P(Pass) or NP(Not Pass), the course score P counts towards credit, and both P and NP do not count towards the GPA.
4. Honors courses, marked with an “(H)” symbol, are usually more challenging, cover topics more in-depth and involve more preparation.
5. Courses marked with a “(G)” symbol are offered primarily for the graduate students. Undergraduates taking such courses in advance will not obtain credits for their undergraduate education, and accordingly, the results obtained therefrom shall not count towards the GPA for their undergraduate education.
6. The transcript records the students' scores for all the courses taken during their time at the University. According to the “Rules and Regulations of Fudan University Concerning the Award of a Bachelor's Degree”, when awarding a degree to a graduating student, the GPA is calculated in conformity with the valid results obtained on all the courses stipulated in the teaching program of the student's major at the time of graduation, and, if the student reaches the required GPA standard for the degree, and satisfies other relevant conditions, a Bachelor's degree will be awarded.

Transcript of Academic Record

Name: Jiang HaiTian
姜海天

Student ID: 19307110022
Date of Birth: 20- Jan -2001
Length of Program: 4 years
Date of Admission: 1- Sept -2019
Major: Data Science and Big Data Technology

Gender: Male
ID NO: 371002200101201519
Total Credits: 122
Educational Experience: Enrolled

Student Type: Degree Student
Nationality: CHN
GPA: 3.85
Degree: Enrolled
